CIRCULAR

Circular.No.6/AMW/TSIIC /2015

Date: 08.01.2016

Sub: TSIIC LTD – Objective criteria for evaluating applications received by TSIIC for allotment of land in Industrial Parks / SEZs – Certain instructions – Issued- Reg. Ref: Allotment Regulations 2012.

<<00o>>

The procedure for evaluation of applications received by the Corporation for allotment of land in Industrial Parks / SEZs in terms of its eligibility by the State Level Allotment Committee and the time lines to be followed by Zonal Managers in issuing required approvals as prescribed are herewith communicated.

Objective criteria for evaluation of application:

- a) The proposed project should be economically viable.
- b) The nature of manufacturing activity should be permissible in that area .
- c) In case of more than 2 applications received for the same plot of land, the criteria of investment, employment potential and line of activity while clearing the application will be examined, thereafter finalizing the allotment process will be done giving preference to woman entrepreneur, SC-ST, socially and physically backward applicant and exarmy personnel.
- d) The application will also be viewed from the angle of raw material used for the proposed industry and it would be examined that the raw material used in the industry shall not contribute to the adverse affect on the natural resources and shall not impact the environment, (such as drawing of ground water etc.,)
- e) Experience of the entrepreneur in the same or related line of activity is an added advantage.

Cont -2

- f) Justification of land- The size of the plot applied for should be in tune with the extent of utilization of land for the production activity, factory building and plant and machinery or any expansion need in the near future.
- g) The proposed project should have the potential to create direct and indirect local employment.
- h) For red category industries (high pollution levels), there should be a green belt in 33% of the total plot area and parking space should be 10% of the total area or 22% of the built up area. For orange and green category industries, there should be a green belt of 10-15% of the total plot area. For projects with manufacture of explosive nature, the building to building space and building to road should be more. The road width should also be in accordance with the proposed manufacturing activity. The unit shall maintain buffer zone around the factory building as envisaged in the act and shall obtain and submit necessary documentation .
